With a 360° rotation, this tracked dumper can fully tip a load at any radius. Useful on sites requiring a large volume carrying capacity where there are restrictions, such as confined routes, tunnels and riverbanks. Where turning and reversing may be a risk for the operator, this offers huge safety and environmental benefits.

The operator is kept in a face-forwarding position at all times, resulting in faster speed of operation with comfort. There is almost never a need to reverse this machine.
